

# Location Based Women's Safety Application

...

Team Fsociety

# WHY?

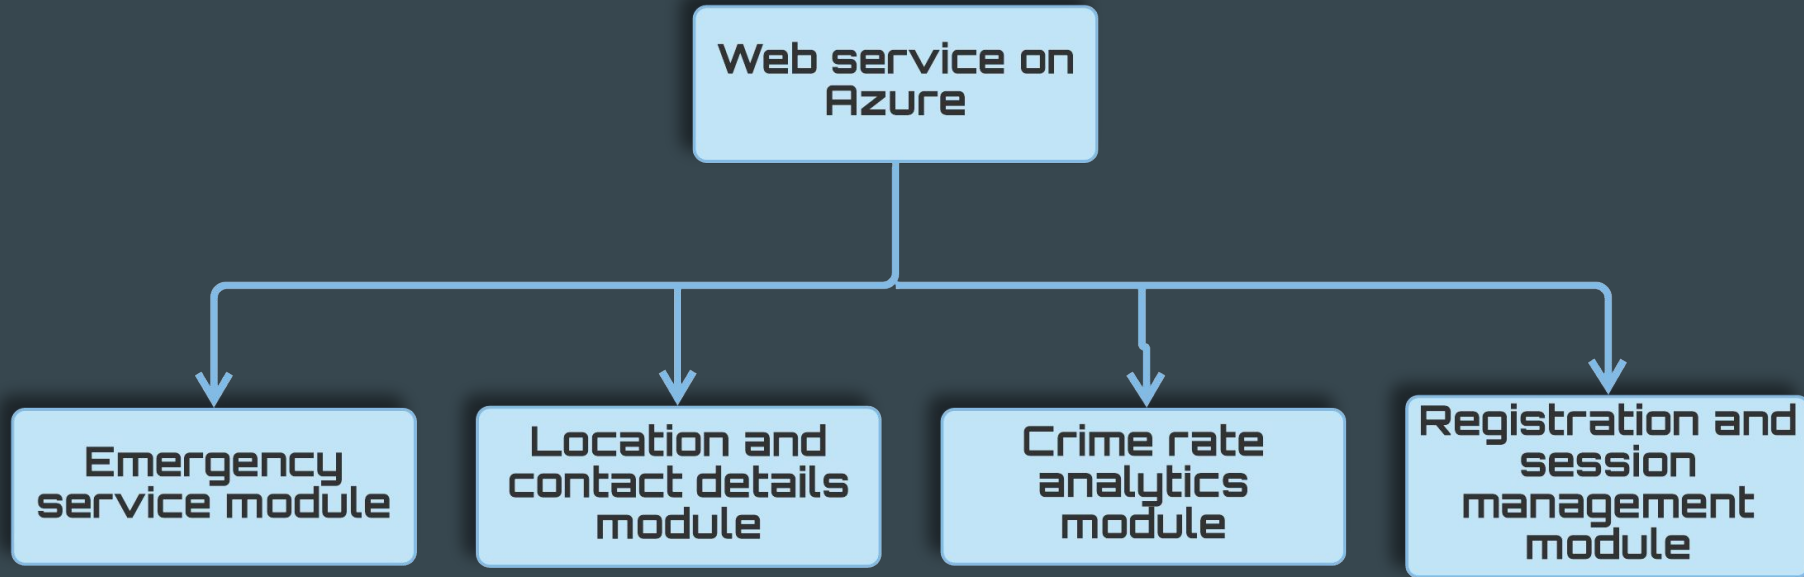

- ➔ Behind every single innovation of mankind, there is a why associated with it. Without a why it becomes completely meaningless.
- ➔ As you know, the crime rates against women is increasing at an alarming rate. Therefore it is the need of the hour to come with a solution that can revolutionize the security status of the women in India.

# Better Safe than Sorry!

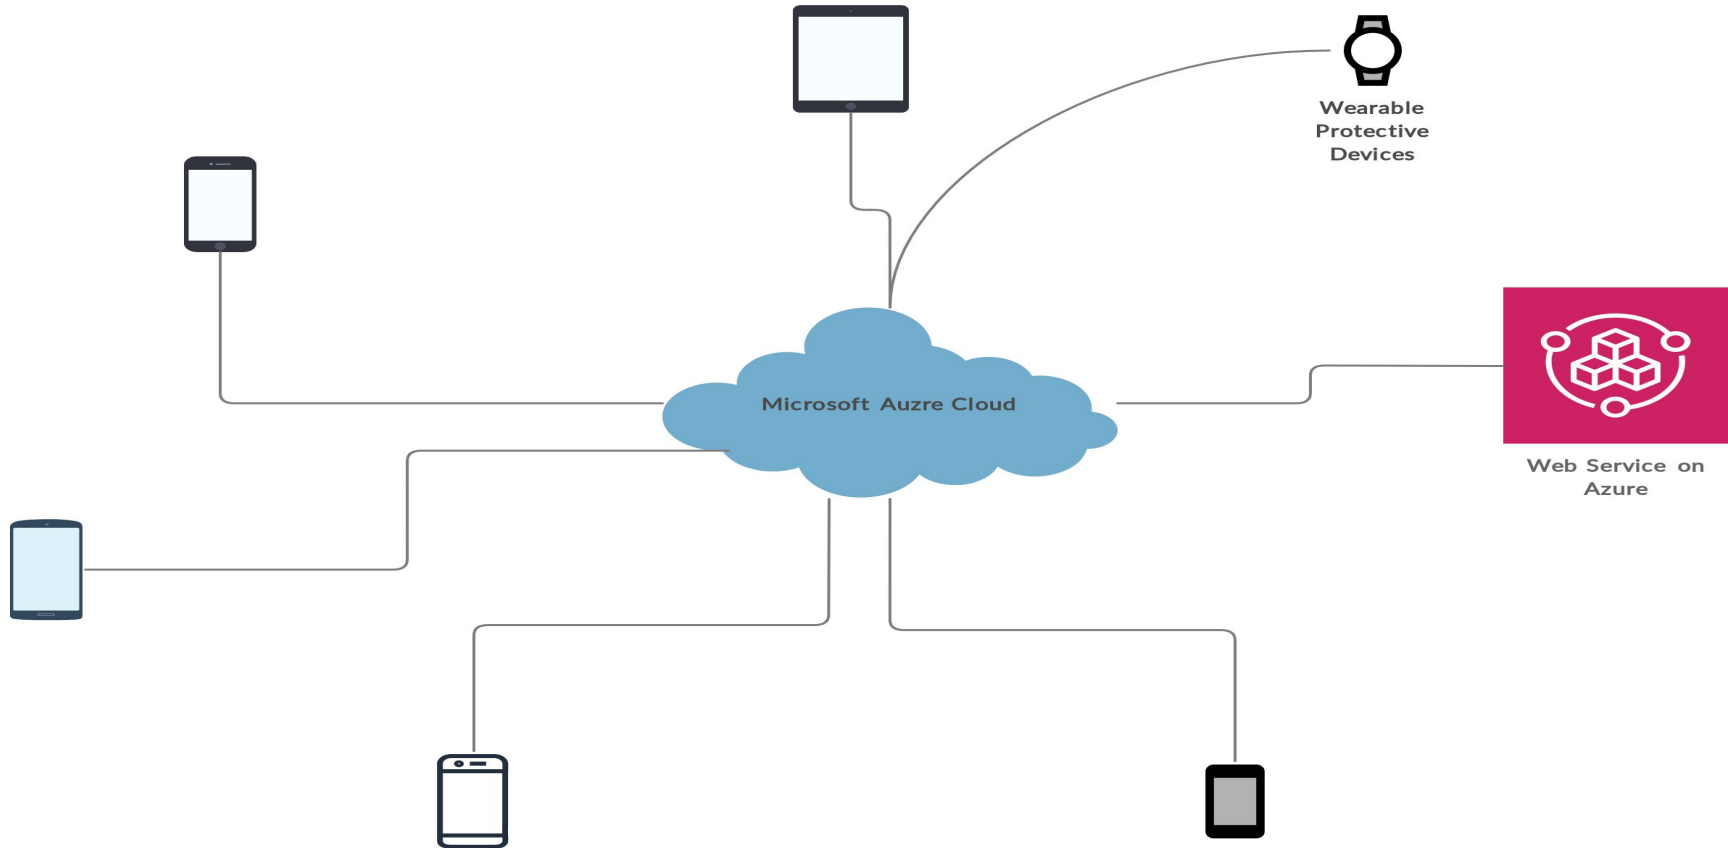

- There are more than 15- 20 women safety applications available. All of them focus on SOS feature. No doubt it's a mandate, *but as the saying goes better safe than sorry!*
  - So what are we doing to prevent undesirable situations rather than dealing with them when they have already occurred?
-

**SO HOW ARE WE UNIQUE???**

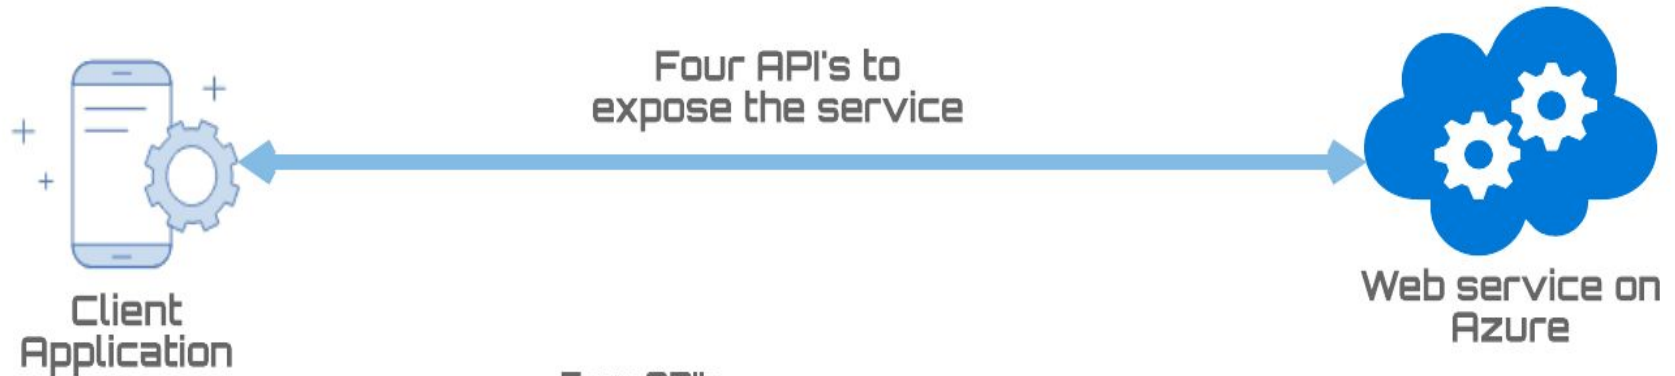

# Services Provided

# Architecture

# Client Server Communication

## Four API's

1. Emergency service
2. Crime rate analytics
3. Location and contacts details
4. Registration and session management
